EDUCATION

The Ohio State University, Fisher College of Business

Bachelor of Science in Business Administration | Expected May 2027

Specialization: Management Information Systems | GPA: 3.5

EXPERIENCE

PNC Financial Services

Digital Product Intern, Insights & Optimization | June - August 2026

- Analyzed more than 400 Glassbox session replays to identify friction in digital banking experiences.
- Evaluated more than 40 digital customer funnels to understand abandonment and potential improvements.
- Developed Qualtrics Text iQ topic structures and keyword strategies to classify more than 3,000 customer comments.
- Translated customer behavior and Voice of Customer insights into recommendations for digital product teams.

Ohio State · Imageomics Institute

Website & Platform Development Intern | June 2025 - Present

- Implemented frontend pages and interactive features for the 30+ page NSF HDR platform using HTML, CSS, JavaScript, and GitHub.
- Developed and refined search, event filtering, pagination, and dynamic content; corrected responsive layouts and navigation links.
- Worked from designer direction and incorporated stakeholder content feedback through GitHub pull requests and reviews.
- Continue to maintain the HDR platform and develop the separate Imageomics website, including post-release and mobile fixes.

Ohio Department of Transportation

Materials Testing & Data Analysis Intern | May - October 2025

- Supported materials testing, quality assurance, and compliance processes.
- Worked with technical documentation, quality standards, and operational data.
- Improved Excel reporting workflows, reducing reporting time by approximately 25%.
- Supported consistent documentation and checks within the materials review process.

Ohio State · Education and Human Ecology

Digital Strategy & Analytics Intern | October 2024 - May 2025

- Analyzed digital engagement and website performance.
- Supported analytics reporting and digital strategy recommendations.
- Communicated findings to nontechnical stakeholders.
- Helped connect performance patterns with content goals and team constraints.
